

FACT SHEET

UMIAQ ENVIRONMENTAL, LLC

UMIAQ Environmental is an SBA 8(a) subsidiary of Ukpeaġvik Inupiat Corporation (UIC), that provides a comprehensive suite of environmental permitting and consulting services with expertise in working in remote locations.

We are a capable, experienced company that integrates its collective resources, skills, and experience to deliver high-quality services and support.

We provide cradle to grave services related to environmental remediation investigations, stakeholder engagement, studies, land use planning, long-range comprehensive planning, capital improvement program planning, engineering support, remedial designs, removal and remedial actions including landfarming, and operations and maintenance activities, studies, Phase I and Phase II environmental site assessments, and regulatory compliance.

Our team supports oil spill response plans, emergency response plans, incident management expertise, National Environmental Policy Act (NEPA) documentation, and permit packages for the most challenging of projects.

Our team has developed relationships and familiarity with Federal, State and Local regulatory agencies that help streamline application processing time through effective communication. Our team consistently meets and exceeds agency expectations. The experience of our permitting team provides increased insight into project permitting timelines and possible challenges that could affect project execution timelines.

UKPEAġVIK IÑUPIAT CORPORATION

A MEMBER OF THE UKPEAġVIK IÑUPIAT CORPORATION FAMILY OF COMPANIES

UMIAQ's staff has designed, permitted, and managed hundreds of projects. Many of our projects have required innovative solutions to provide practical functionality while meeting environmental and logistical challenges. UMIAQ understands the importance of environmental considerations present within each project, such as environmental sensitivity, water quality, and wetland delineation assessments, wildlife interactions, and a wealth of other environmentally based issues.

UMIAQ Environmental approaches projects by looking at the project life cycle versus isolated aspects and tasks. Such a holistic approach allows clients to be aware of challenges and opportunities throughout the project life cycle versus one point in time. This allows clients the foresight to prepare for any future challenges with the project and efficiently remedy them in a cost-effective manner.

*Our Iñupiat employees are
ambassadors for their culture
and stewards of
the environment.*
